Russian FFA distributor shows at Music Moscow - October 2010

Show Atelier show FFA product at the Music Moscow trade show. The show is held in an exhibition centre in one of Moscow's forest parks. The location is very beautiful and calming in a very busy city. The weather was exceptional with lots of people enjoying the sunshine and taking part in many activities within the park which include traditionally played chess. Held over 4 days the show offers all aspects of the Music industry including musical instruments, lighting as well as all types of PA systems. Interestingly a loud room is included where manufactures can play their sound systems to potential customers. Each sound system has five minutes to play a selection of music and this is rotated all day around a large hall. The levels played can be very loud with no apparent sound restrictions! Show Atelier demonstrated a full line up of FFA product powering British loudspeaker manufacture EM Acoustics loudspeakers. Dave and Chris very much enjoyed our trip to Moscow which included an excellent site seeing trip around the city. Our thanks go to the Show Atelier team for their continued support of our products and for being such kind hosts.
