### FFA in Facultet / Moscow

#### Dear Full Fat Audio,

I want to inform you that 13th of November in Moscow had been opened a new night club "Facultet" ("The Faculty")

All who visited the club that night noted the tremendous sound.

This effect was achieved by a few kilowatt-quality sound from EM Acoustics(UK) with a gain of Full Fat Audio (UK). 4 subwoofers MSE-118 QUAKE + 4 satellites EMS-152 and 6 satellites EMS-121. Subwoofers have been reinforced by one amplifier FFA10000DP, portal acoustic systems EMS152 reinforced by one amplifier FFA6000DP, and backend loudspeaker systems reinforced by amplifiers FFA2000S and FFA3600S. As the DJ equipment used two Pioneer CDJ1000 mK3, Mixer DJM800 and two Technics 1210 turntables.

Light equipment helped to complete a coherent club's atmosphere. To create a dynamic and fascinating effect were used following equipment: 4 light heads SPOT - Robe ClubSpot 250 CT, 6 light heads WASH - Robe ClubWash 250 CT, 4 scanners Robe ClubScan 250 CT, 3 light LED-heads Briteq BT 36-II, LED-lighting JB Systems LedPar 64 and 4 JB Systems Led Wash, 4 strobes JB Systems FL 1800D, 2 laser projectors JB Systems Lounge Laser and 2 laser projectors Laser Burst 3. Any serious party must be accompanied by a constant quality smoke - this task is easily handled by equipment from Look Solutions (Germany) - smoke machines Viper NT and Heyzer Unique 2.1. The best solution for controlling of all these light equipment has become an innovative program from the Jands company - Vista (Australia).

With Best Regards,
