## Showcasing at SIEL Expo - January 2012

Full Fat Audio presented amplifiers at the 2012 SIEL show Paris, France. France is one of Full Fat Audio's biggest export markets especially in the high end nightclub market.

FFA exclusive distribution partner Solution one Audio exhibited with FFA staff and also showed Funktion One Loudspeakers which they are exclusive distributor.

The Stand was busy throughout the event with the late night evening event culminating in a party for the show's visitors. Disco and Funk music was the sound played though the FFA powered Funktion one loudspeakers much to the enjoyment of everyone including the venues staff.

The venue is of particular note which is a beautifully restored cast/wrought iron framed warehouse, It has been extensively acoustically treated and offers exceptional acoustics and was a joy to work in for the 3 days of the show.

Solution One One customer Argon audio from the south of France in Montpellier offer us their opinion of FFA amplifiers –

*Merci pour le prêt du FFA 4004. Je l'ai essayé et je trouve l'appareil excellent. Très bonne musicalité et bonne dynamique. Le meilleur classe D que j'ai écouté. Je suppose que FFA veut dire "un son complètement gras", c'est à dire riche musicalement, un "gros son". Mission accomplie. Bravo messieurs les Anglais.*
