New Installation In T-Bar

T-Bar Londons East End Premier Underground Dance Venue Relocation

T Bar

We started working with Project Audio on the launch of our now infamous club night Stink, hosted by Damian Lazarus & Michael Mayer in 2005. One night with their temporary install of two small Funktion 1 stacks and we were hooked. Our then system paled in comparison and all focus was on having our very own F1 custom built for us.

For a small venue it was a massive investment but one which ultimately transformed us from DJ bar to club overnight. The attention, commitment and enthusiasm we received from all the crew at Project Audio resulted in a phenomenal sound system and a relationship which has continued into our latest venture, the outcome of which has been a total triumph. Funktion 1 and Project Audio have been a key element to the success of T Bar to date and will no doubt continue to be long into the future.
